# FitBuddy: Reference Links & Documentation

AI Fitness Plan Generator using Gemini Models | Official Resources & References

## 1. Overview

To build, scale, and optimize the ***FitBuddy*** AI Fitness Plan Generator, developers and learners can utilize key official documentation and developer libraries listed below.

> **Resource Objective:** Provide direct access to official frameworks, AI models, and backend libraries utilized in this project.

## 2. Core Documentation & Resource Links

- **Google Gemini API Documentation:**
  - Official guide for implementing generative models and SDKs.
  - Link: https://ai.google.dev/docs
- **Google Generative AI Python SDK:**
  - Python library package for integrating Gemini Pro.
  - Link: https://pypi.org/project/google-generativeai/
- **FastAPI Documentation:**
  - High-performance Python web framework for building APIs and handling routing.
  - Link: https://fastapi.tiangolo.com/
- **Jinja2 Templating Engine:**
  - Full-featured template engine for Python used in rendering HTML dashboards.
  - Link: https://jinja.palletsprojects.com/

## 3. Summary

Utilizing these foundational documentation links ensures developers stay updated with best practices, security guidelines, and feature updates for both FastAPI and Gemini models.
